World Leading Australian Manufacturer of 4X4 Rear Bars, Wheel Carriers and Jerry Can Holders

Fit a Kaymar rear bar to your vehicle and enjoy the benefits...

Carry what you need, where you need it and improve offroad clearance and departure angle.

The world leader

Kaymar is a proudly independent Australian small business and manufactures high quality products which have been carefully designed and crafted for maximum compatibility with specific models of leading 4x4 vehicles sought by experienced offroaders.

Widely recognized as the world's foremost innovator of rear end accessories for 4x4 vehicles with Kaymar products are known and appreciated across the world - USA, Russia, Europe, South America, Middle East, Asia, Africa and the South Pacific.

Why invest in a Kaymar rear bar? Because you are not average!

Modern vehicles are manufactured to meet cost and production criteria satisfactory for the needs of the average buyer.

The greater demands of off road and long haul use requires the replacement of "mall rated" components with harder wearing and more practical accessories.

Australian owned, American support

More than 30 years proven design and manufacturing excellence and reliability building rear bars and accessories for outback travelers throughout Australia and across the world. With a US dealer in California, past hassles with ordering, communications, currency exchange, shipping and importation have been resolved.

We custom order to meet unique customer needs and also stock products as production queues and demand will allow.

And we don't just sell parts, we understand what it takes to install them properly, as our partner Georg Esterer runs a nationally known offroad shop in Stockton, California – **Valley Hybrids**.
